ANTHONY OZIOKO

RESEARCH CV | COMPUTER SCIENCE • EDUCATIONAL TECHNOLOGY • SOFTWARE DEVELOPMENT

Enugu, Nigeria | 09037191117 | 09169600724 | oziokoanthony@gmail.com

RESEARCH PROFILE

Computer Science professional with experience in digital operations, educational technology, software development, technology-enabled administration, and computer science teaching. Interested in applying analytical thinking and practical software development to research and problem-solving, particularly in educational technology, document processing, digital learning, information systems, and technology-supported organizational processes. Experienced in developing and supporting practical technology projects involving APIs, databases, document processing, computer-based testing, and digital workflows.

RESEARCH INTERESTS

- Educational technology and digital learning systems
- Document processing and information retrieval
- Software engineering and API-based applications
- Digital administration and information systems
- Technology-supported assessment and learning workflows

EDUCATION

University of Nigeria, Nsukka | 2024
B.Sc. Computer Science — In View

University of the People | 2018
Associate Degree in Computer Science

Imashayi High School | 2013
National Examination Council (NECO)

SELECTED TECHNOLOGY PROJECTS

Student-Guide — Educational Technology Platform

Developed an educational technology platform concept for interacting with educational documents and learning materials using document processing, APIs, databases, and modern web technologies.

Technologies / methods: *Python, FastAPI, TypeScript, React, Tailwind CSS, PyPDF2, ChromaDB*

Computer-Based Testing Platform

Developed a CBT solution supporting student identification, timed examinations, objective and theory assessments, automated results, and digital reporting.

Technologies / methods: *Web technologies and digital assessment workflows*

School Management & Digital Administration

Designed and supported technology solutions for educational administration, digital portals, registration workflows, student information processes, and technology-enabled school operations.

Technologies / methods: *Digital administration, workflow support, information management*

GiveNaija — NGO Donations & Operations Platform

Contributed to the design of a platform focused on digital donations, campaign management, financial accountability, audit logging, and operational transparency.

Technologies / methods: *PostgreSQL, API development, transactions, audit trails, webhooks, SSE, security-focused backend architecture*

Iya Ngozi's Kitchen — Digital Ordering & Operations System

Developed a backend system for menu management, customer orders, authentication, staff operations, order-status management, and automated receipt processing.

Technologies / methods: *FastAPI, SQLAlchemy, authentication, sessions, background processing*

PROFESSIONAL EXPERIENCE

Daughters of Divine Love Congregation
Digital & Operations Officer / Computer Science Teacher

- Support digital platforms and technology-enabled school administration.
- Coordinate technology-related registration activities, including JAMB, WAEC, and NECO processes.
- Teach Computer Science, ICT, Microsoft Office, and programming.
- Support computer-based testing and digital learning initiatives.
- Help identify technology requirements, troubleshoot issues, and improve digital workflows.

The Eye Specialists' Hospital
Digital Operations Personnel

- Supported digital operations, administrative technology activities, and organizational records.
- Assisted users with digital tools and technology-related issues.
- Helped maintain efficient digital workflows and technology-enabled processes.

Love FM Radio Station, Milky Hill Ngwo
Digital Marketer / Digital Operations

- Supported online visibility, digital communication, content distribution, and audience engagement.
- Assisted with digital campaign coordination and content management.
- Used digital performance information to support improvements in online activities.

TECHNICAL AND RESEARCH-RELATED SKILLS

Research-related strengths: Analytical thinking, problem-solving, documentation and reporting, attention to detail, stakeholder engagement, process improvement, presentation and facilitation.

Software and data technologies: Python, FastAPI, TypeScript, React, Tailwind CSS, PyPDF2, ChromaDB, PostgreSQL, SQLAlchemy, API development, document processing, audit trails, and webhooks.

IT and digital operations: Technical troubleshooting, systems and application support, software installation, digital records management, user support, computer training, access-control awareness, and digital platform administration.

Product and project work: Technology requirements gathering, program/project design, program management, product management, ICT project coordination, and cross-functional collaboration.

Microsoft Office: Microsoft Word, Excel, PowerPoint, Access, and Outlook.

CERTIFICATIONS AND TRAINING

- AWS Level 5 CPE Certification
- Software Engineer (FullStack) Certificate
- Program Management and Product Design Certification
- Microsoft Office Suite / Computer Proficiency Certificate
- Global Mentorship Initiative — Mentorship Certificate Course
- ALX Software Engineering Programme
- Google Digital Skills for Africa
- Digital Marketing Training
- Desktop Publishing / Computer Applications Training

PROFESSIONAL STRENGTHS

Team collaboration, effective communication, technical training, mentoring, time and priority management, documentation, stakeholder engagement, and cross-functional collaboration.
